

2017 Super Diggg
Saturday April 29th

Super Diggg™

TripMaster letter #4

March 3, 2017

Questions have been coming in...

Because of our new location and new features this year, a number of questions have been sent in.

We'll respond to them now, so you get the info before registration opens at midnight tonight.

Q: What about parking?

A: There is limited parking. We have permission to park across the street on Private Property. Thanks to F& R Associates, LLC for their outstanding support!!!

Q: Although you tried, your description as to where the premium material will be, and exactly what it is, is not clear.

A: The Mill Dump Material is located in the Buckwheat Mineral Dump, in a special fenced in area. It has been there for several years!!

I understand that only a few scoops have been released on the outside of the

This is a BIG DEAL!!

It contains material form the famous Parker Shaft!!!

I will be getting more details from the Franklin Mineral Museum soon!!

(Like the estimated amount, which is a lot of Tons!!!)

This event is to directly support The Franklin Mineral Museum, DVESS, and all collecting clubs in the world!!

I would not miss this opportunity.

We apologize for some of this year's information being a bit skimpy, but we were caught between those who want more info before registering and those who wanted to register right away. We tried to compromise by delaying the registration to a weekend and time when most people who want to register early would be able to do so, and by providing as much information detail as is available at this time.
